EDUCATION

Yale University (Berkeley College) | B.S. Electrical Engineering & Computer Science | New Haven, CT Expected May 2028
GPA: 3.82 / 4.00

Relevant Coursework: Systems Programming and Computer Organization, Digital Systems, Circuits and Systems Design, Data Structures, Computer-Aided Engineering, Creative Embedded Systems, Intelligent Robotics

WORK EXPERIENCE

Summer Intern | Technology, Policy, & Operations (TPO) Group Jun. - Aug. 2026
Water Watch Center (WWC) · Threat intelligence, cloud tooling, web dev, and secure data destruction research

- Assisted with standing up threat-intelligence sharing for the WWC, a new initiative aiming to pair the 50,000+ rural water utilities across the U.S. with vetted security providers, supported deployment and configuration of a MISP platform, giving under-resourced utilities a shared channel for tracking advanced threats.
- With feed reliability unproven ahead of onboarding, wrote Python scripts to test the MISP REST client and feeds against an AWS S3 event store, confirming events persisted correctly and surfacing config gaps before utilities connected. The MISP instance (AWS EC2) now contains over 2000 events and counting as more MSSPs are onboarded.
- Audited the WWC network architecture against the Purdue Model, analyzing 6 network layers to validate operational security and ensure design viability for industrial OT environments.
- Facing recurring overhead from employees ordering business cards one by one, built a micro-SaaS with AI-assisted development and AWS tooling (scoped IAM user, S3), integrating an on-demand printing company's API so staff could self-serve orders, saving up to 20 minutes per order. Now used by all 15 company employees.
- To remove client products from the grey market, ordered, disassembled, and documented 25 electronic devices using Google Workspace (Drive, Sheets) and Notion, set up a Bright Data residential proxy for foreign-network product search, coordinated data destruction services for the acquired devices.

Tour Guide & Deckhand | Portland Discovery Land & Sea Tours | Portland, ME May - Aug. 2025, 2026
Responsible for guest experience on cruises of up to 100 passengers through the Casco Bay islands, delivered two-hour narrated tours on 12+ hour shifts plus bartending and docking duties.

Tennis Director Assistant | Ocean Park Association | Ocean Park, ME Jun. - Aug. 2020 - 2024
Managed clay court reservations, maintenance, and 20-player round-robin programming through peak summer demand, keeping courts playable and scheduling conflicts to a minimum.
Oversaw daily opening and closing operations and onboarded seasonal staff, cultivating a healthy community between employees, regular players, and new members.

LEADERSHIP EXPERIENCE

Project Manager | Design For America, Yale Schwarzman Center | New Haven, CT Oct. 2025 - Present
Leading 10+ students in the building and implementation of a "Postcard-Vending Machine" for Yale student artists to showcase their artwork in a major campus thoroughfare.
Designing the machine's mechanical and electrical systems completely from scratch on a \$1000 budget using CAD, electronics, and rapid prototyping techniques, overseeing materials procurement and iterative testing.

Team Member & Practice Coordinator | Yale Club Tennis | New Haven, CT Sep. 2024 - Present
Planned and coordinated the 60+ practices across the school year, managing court scheduling and attendance so the team trains consistently.

PROJECTS

Dice Mural Machine | Team Member Mar. 2026 - Present
Building a machine that takes an image as input and outputs a mural of that image rendered in dice.
3D modeled and printed 20+ custom parts in SolidWorks, animating assemblies for pre-print validation to catch fit issues before committing print time.
Implemented the electronics stack — microcontrollers, motor drivers, motors, and OLED displays — integrating control and feedback into one system.

SKILLS

Programming: C, C++ (Arduino), Python, Bash (Linux terminal), Assembly (Novice)

Software & Tools: SolidWorks, AWS (S3, IAM), MISP, Git/GitHub, Notion, Linear, Google Workspace

ACTIVITIES

Danceworks · Intramural Sports (basketball, soccer, pickleball, broomball) · Art
